

For Your Peace of Mind

Customized solutions for any specification and application
from prototype to full turn key projects

Markets

Leading Israeli industries have chosen time and again to collaborate with Zivudronen for the execution of their sophisticated manufacturing and installation projects.

Communications | Defense and Security
Digital Printing | High-Tech

Facts and Figures

- Established in 1987 Zivudronen Ltd. is a leading manufacturer of electronic packaging material and mechanical assemblies.
- Provides the full production cycle of design, engineering and manufacturing of customized solutions for all industries.
- From designed prototypes to full production series for high-tech, communications, medical and military industries
- More than 120 professional and dedicated employees and long term customer relations positioned Zivudronen among the leading companies in the Israeli Market.
- All our products are manufactured in our 7,000 square meters of advanced manufacturing facilities.

Good Reasons for Working with Zivudronen

Partnership

Zivudronen aims to maintain long-term relationships with our customers. We do so by making our customers' satisfaction our main goal.

Excellence

Excellence is an approach which we, at Zivudronen, implement in all aspects of our business activities. Know-how, professionalism and quality are the key to excellence.

Innovation

We apply innovation to every step of our manufacturing cycle. Our advanced engineering and manufacturing technologies enable us to overcome any challenge and offer better and more cost effective solutions.

Working environment

We believe that our working environment reflects who we are and how we do it. We manage our company from modern, advanced and fully equipped manufacturing facilities.

Quality and Standards

Reliability is the product of high standards. Zivudronen designs and manufactures all its products according to international standards. Strict manufacturing procedures control the entire production cycle, from set-up to certificate of compliance.

Our products comply with all the required international standards

Health, Safety and the Environment

We are committed to protecting our community and the environment we work and live in, and caring for the health and safety of our employees.

The products and the production processes are all standard compliant providing safe, long lasting, anticorrosive, non-hazardous products that are environmentally safe.

Advanced Capabilities & Production Technologies

We offer our customers advanced facilities, engineering and manufacturing capabilities and a reliable, experienced management eager to execute your specifications to perfection.

- Design engineering
- Electro mechanical assemblies
- Punch-laser combination machine
- C.N.C laser machines
- C.N.C punching machines
- C.N.C bending machines
- C.N.C milling machines
- Grinding and polishing
- Argon and CO₂ welding
- Hardware insertion machines department
- Silk screen printing department

Product Families

Information Kiosks

Large government, municipal, health and financial sectors are introducing information kiosks for routine operations and services used by the general public. We approach each project as a unique challenge to provide uncompromising solutions designing user-friendly, durable and weather-proof information kiosks that have made us market leaders in this field.

Indoor, Outdoor and 19" Racks

Zivudronen specializes in all types of extra durable racks and cabinets. We have incorporated all the required features for long-lasting safety and operation of the equipment which they house: structurally stable, resistance to all extreme weather conditions, anti-corrosion, vandal proof hinges, secure multi-locking systems, ventilation and air-conditioning.

Command and Control Consoles

Our unique, modular command and control, consoles are engineered and manufactured mainly for the security and defense markets. These consoles can accommodate numerous, multi-functional displays, panoramic control stations and operator stations for high-performance applications such as surveillance and operation of weapon systems.

Turn-Key & Special Projects

We specializes in executing large scale full turn key projects including production, procurement and material management, improving our operations constantly for optimal cost effectiveness. Our technological vision, expert engineering and versatility qualify us to provide customized solutions for projects of any technological, human engineering and functional requirement as well as scope:

- Skins and Enclosures
- Electronic Boxes
- Ruggedized Racks & Control Station
